

#### Ques.4- Describe the best project you have worked on

**I consider my payment gateway development project** the best one I've ever worked on. The reason is simple—I learned so much while working on this project. It was a great experience. You learn the most when you fail, and I believe this project helped me to become a better version of myself. Meanwhile in this project i have learned that Sometimes you succeed to reach your goals, and other times you fail. At the end of the day, you learned so many things. This project I worked on was great, because it helped me to become better in what I do, to move forward. **And I always tried my best.** Whether it eventually panned out in the way we wanted is of secondary importance to me.
