

Ques.5- If you are to start a software company, name 2 people from your batch whom you will choose as your partner

I will choose my friend ABHAY and SHASHANK as my partner because If you have an idea, the right partner can help you achieve your goals more quickly and efficiently. For example, you could do double the sales of what you had projected working alone. On the contrary, if you work with an inadequate partner, the most likely thing is that you will not achieve your goals or you will delay them enormously. Hence the vital importance of choosing well the partner you want to work with! And the right partner will be someone who is motivated by business and your idea.
